Hi John:

The short answer to your question is that the UECA in question has not been signed yet. However, it is any day now that it will be signed.

The long-version of the answer/explanation is that Koppers Follansbee (formerly Beazer East - WVD004336749) Environmental Covenant was initially signed by the facility owner and the holder and sent to us. But our director (who is to be the only signatory on it) found the language of a few items in the text of the document (mainly in the restrictions section) to too broad and not specific enough from an enforcement perspective and asked us to revise it. She also thought a few sentences/clauses were redundant as they were repeated elsewhere in the text. I had to go back to the signatories (the reps of the owner and the holder) to work out and confirm with them the language so that it is acceptable to them (as proposed by our director). Then we realized the exhibit had invalid property boundary data and in general not good enough for Region 3 webpage posting. I got the accurate data from the facility reps and Joel Hennessey of your office improved the Exhibits for the document and made it acceptable to EPA/Region 3 standards. Once these were done the document/exhibit was sent back to the reps of the owner/holder to circulate to signatures. So, at this point I am waiting for the doc to come back for our director's signature any day. Once it is signed here it will go back to the reps of the owner/holder to get it recorded at the county of record for the site and WVDEP will receive the original copy. I will make sure I will CC you when I am sending an electronic copy of it to Luis since he is currently the default RPM for the site. I did not mean to bore you with all of this but that where we are with it.. Pretty long and rather frustrating process (especially if you're not used to it:☹)

Unfortunately, I do not have any other information regarding the permit. I could check our file room if you'd like.

Also, do you have a copy to the Koppers – Follansbee UECA, which was signed this year?

Thanks,  
John

You're welcome. Do you happen to see any documents that show the issuance/expiration dates for the permit?

Kenan - Module X is what I was looking for

Thank You!  
John

Hi John,  
The two (2) attached pdf documents are what I have found in the our folder for MPM silicones site. The first document (MPM Permit) is 29 pages and includes the CA module (Module X) consisting of 9 pages which makes up the 2<sup>nd</sup> pdf document. See if one of these is good enough for posting on the facility webpage.

Hello Kenan,

Do you have a copy of MPM Silicones' (EPA ID# WVD004325353) RCRA Permit? If so, I would like to add it to our facility webpage.

Thanks!
